PREFACE

VOLUME SEVEN, THE THIRD supplement to Philip Lee Phillips' *A List of Geographical Atlases in the Library of Congress*, was published in 1973. It includes descriptions of 8,181 atlases of the Western Hemisphere which were added to the collections of the Library of Congress between 1920 and 1969. Volume seven also includes an author list but not the index, which is here presented as volume eight of the series.

Indexed in this volume are areas, subjects, map authors, engravers, lithographers, publishers, etc., and atlas titles with distinctive words. Names which appear in the author list in volume seven are not indexed, but names of all other persons mentioned are included. All publishers are presented alphabetically in this index, under the entry "Publishers."

In preparing this index the compiler has had the assistance, for varying periods of time, of [several] present and former staff members of the Geography and Map Division. Their cooperation is gratefully acknowledged, but the compiler assumes full responsibility for any inaccuracies or limitations in the index.

Index

NUMBERS REFER TO MAIN ENTRIES

Letters t, n, c, and v refer to titles, notes, contents, and volumes.

Numbers following the letter c refer to numbers in the contents.
